## Simple Type cdml:AlphanumericIdType

Namespace	urn:cdml:schema:common:types
Annotations	Non empty identifier
Diagram	<p>The diagram shows a UML class named 'AlphanumericIdType' with a hollow circle symbol indicating it is a restriction. A solid line connects it to another class named 'token'. A callout bubble labeled 'Non empty identifier' points to the original class, and another labeled 'Built-in derived type. The token datatype represents tokenized strings. The base type of token is normalizedString.' points to the target class.</p>
